

POSITION ANNOUNCEMENT
SEASONAL LAND STEWARDSHIP TECHNICIAN

Organization: The Oakland Township Parks and Recreation Commission (PRC) is a local elected park agency in Oakland County in southeast Michigan. The PRC is responsible for over 1100 acres of Township park land as well as the Oakland Township portion of the Paint Creek Trail. The PRC manages a 10-year park millage as well as a 10-year land preservation millage. These two millages fund all Township park/natural area acquisition, planning, development, operation and maintenance.

As one of the first communities in the state to place conservation easements on local parkland and to devote funds to natural areas preservation, Oakland Township has been ahead of its time in the identification, preservation, and protection of natural areas. Oakland Township has demonstrated its long-term commitment to the identification and preservation of natural areas through the purchase of parks to protect these resources. Most of the parks acquired by the Township contain defined high-priority natural areas, including glacial lakes, prairie remnants, oak-pine barrens, and Clinton River tributaries. Conservation easements have been dedicated to protect key parkland natural areas.

Position: The Stewardship Technician position is a full-time, seasonal (to September 28), hourly position to be employed by the PRC. Duties include the management of the Township parks' natural areas under the direction of the Natural Areas Stewardship Manager. Work tasks may include species monitoring, invasive species control, prescribed burning, and assisting with volunteer stewardship workdays. This position will require cooperation with PRC staff, partner organizations, volunteers, and the general public. This position may be ideal for a candidate seeking an academic internship, experience in the natural resource management field, or continued education in stewardship and land management. It is the responsibility of the Stewardship Technician to make any and all arrangements with an accredited institution if an internship is desired.

Qualifications: Must possess an awareness of conservation issues and knowledge of general biological and ecological principles as they relate to natural areas management; able to identify plant and animals species; able to operate GPS units and interpret maps; skill in field data collection and management; able to use tools safely; possess a willingness to obtain additional training (provided by Township); possess an ability to perform physical work in harsh conditions and inclement weather; and able to work under minimal supervision. Must be willing to provide their own transportation if needed. Must be willing and able to work a flexible schedule, including some evenings and weekends.

Please see the Parks and Recreation page of the Oakland Township website, www.oaklandtownship.org, for a complete list of specific responsibilities and required qualifications.

Pay Rate, Starting Date and Work Schedule: Pay will be commensurate with education and work experience. One position is available. Anticipated start date is July 12, but somewhat flexible. Typically work 40 hours/week Monday to Friday, with occasional weekends or evenings for special events. The end of the season is September 28.

To Apply: Submit cover letter, resume, and three professional references to Ben VanderWeide, Natural Areas Stewardship Manager:

Email: bvanderweide@oaklandtownship.org, with "Seasonal Land Stewardship Technician Application" in the subject line.

Mail: Seasonal Land Stewardship Technician Application
Oakland Township Parks and Recreation
4393 Collins Road
Rochester, MI 48306
